650/11

Title: 80 -90 % Three Time Resolution Rule

The Problem:

Year after year the same resolutions have to be submitted. The resolutions have met all requirements yet, because some committee or counsel won't let the system play out and advance them to be voted on state wide, they get brought back again and again. This is why some have chosen to by pass the congress and go right through their legislators. This is fully understandable, when a good idea falls on deaf ears.

BE IT RESOLVED, that the Conservation Congress at its annual meeting in Walworth County on April 11, 2011 recommend's that the Conservation Congress work with the Department to take action to correct this situation by introducing rule changes making any resolution that has passed three years in a row in a county by 80 or 90 % or more (which ever % the Dept. considers reasonable) be advanced to the spring hearings for state wide vote with or without Congress Committee and/or Counsel approval.
