Resolution (1) 61-01-10

Title: Panfish Bag limit on Chequamegon waters better known as Miller Dam

Problem: Our Lake Association would like a reduction in the Panfish limit on Chequamegon waters from 25 down to 15. We realize that with the Heavy Fishing Pressure and the Number of Fishermen Taking Full Bag limits; were concerned that this Flowage cannot sustain this type of pressure.

Be it Resolved that the Conservation Congress at its annual meeting recommends that the Conservation Congress work with the Department to take action to correct this situation by introducing a rule change allowing a reduction in a Bag limit on Chequamegon waters.
