Musky size limit on Castle Rock and Petenwell Lakes from 45" to 50"

The Problem: Petenwell and Castle Rock are not being used to their full potential as muskie waters. Other states are having bigger size limits on their trophy Lakes, like 54". And Petenwell and Castle Rock are both trophy musky waters that deserve to at least ~~have~~ have a 50" size limit for Muskie

Solution:

Change the musky size limit on Petenwell and Castle rock Lakes from 45" to 50" To match their trophy potential.
