Title: Pheasants for All

The problem: Pheasants and pheasant hunters are on the decline. Many are week end hunters. These include families. They become discouraged due to the lack of birds. Week ends present the only opportunity for many to hunt.

Solution: In order to provide more opportunity for all, 10 tags should be provided to each person buying a pheasant stamp. No one person needs to harvest more than 10 pheasants per year. Many others would then have the opportunity for quality hunting. If not considered as a state wide law, at least this tag system should be implemented on all public grounds.
