70-01

TITLE

State Wide 14"inch Large Mouth Bass (LMB) Limit.

THE PROBLEM,

Numerous times the Conservation Congress has had to address the 14"inch (LMB) issue. From anglers across the state they reject this 14" limit and opt for a change. They see an abundent amount of small stunted (LMB) along with a dwindling population of Walleye.

A five year exhaustive study presented to the Warm Waters Committee Sept, 2011 from a fish biologist addressed this issue. Although his conclusions are not the policy of the DNR, they mirror what we anglers know to be a state wide problem with the current 14" limit.

IT RESOLVED,

That the Coservtion Congress at this spring meeting in Waushara County April 9 2012, adopt this resolution that a 16" to 18"inch slot be set for the spawning (LMB) and that all other (LMB) be harvested.
