54-08-16

Title: Spearing rough fish 24hrs per day.

The problem: Hand spearing only allowed from dawn till dusk.

We feel hand spearing invasive species "Carp" should not be regulated and can be done safely.

We feel it is the responsibility of all to promote + encourage the removale of these fish from Wisconsin Waterways.

Be it Resolved, that the Conservation Congress at its annual meeting held in Rock Co. on April 11th 2016 recommend that the Congress work with the Department to take action to correct this by introducing the rule Change: Allowing hand spearing hours to be extended to 24hrs per day.
