Kristina Betzold,

Please repair the Estabrook Dam and add Automated Dam Gates.

Thru all the years I have been in this area, the Dam Gates have been open in the Winter for Water Draw Down. For safety and Spring melting please do a Winter Water Draw Down.

I do not think a fish passage is needed. If the Dam Gates are open during the fish migration period in the Spring and Fall, the fish can pass thru the open gates.

Thank you,

Stephen Gusho
