I would like the Estabrook dam to be repaired. As a Glendale resident I see the river daily and feel that the current status of the river is horrible. Other half-way proposals are not really any better.

Few other projects have gone through this kind of delays. This is also clearly an arbitrary concern about one section of the river. The Mequon portion isn't being considered for draw down, neither is the downtown area being considered for a draw down. Urban and recreational areas all over the State use dams for control and usefulness. The Estabrook dam needs to be restored to its original use and intent.
