Subject: Estabrook Dam - Support for Removal
Date: Thursday, March 24, 2016 12:29:42 PM

I'm very much against rebuilding this dam in Eastbrook. I believe the responsible and ecologically best alternative is to remove it and allow the natural habitat to establish itself once again as it was intended.

The dredging, sediment build up, low oxygen levels, and fish hindrance do not offset the recreational benefits that come from motorized boat use for the few residents that have access.

The overall removal will far benefit society and the environment in the long term.

Please let me know how I can support the removal of this dam both financially and with my support.

Regards,

Adam W. Chan.
