

**Problem:**

Husband and wife receive a discount when purchasing a fishing license but do not when they purchase any other license. A fishing license separate for each individual would cost \$40.00. Together the cost is \$31.00 a difference of 22.5% the individual cost.

**Proposal:**

Create a husband / wife conservation patron and a husband / wife sportsman license at the same discounted price of 22.5%. This percentage doesn't have to be the exact discount offered, but a similar discount would entertain more family involvement into our hunting heritage and potentially increase revenue to the Department of Natural Resources.

**Example**

Husband and wife conservation patron license  
\$165.00 + \$165.00 = \$330.00 discount 22.5%  
For a cost of \$255.75

Husband and wife sportsman license  
\$60.00 + \$60.00 = \$120.00 discount 22.5%  
For a cost of \$93.00

BE IT RESOLVED, the conservation congress at its annual meeting held in Grant County on April 16, 2007 recommends that the Department of Natural Resources take action to correct this situation by allowing husbands and wives to purchase conservation patrons and sportsman's license at a discounted price similar to the husband / wife fishing license.
