Re: Small Mouth Bass Fishing on the Little Wolf River

As concerned sportsmen, Small Mouth Bass fishermen, property owners along the Little Wolf River, and all others concerned about the decline of the Small Mouth Bass population in particular, especially the rapid decrease of the 19 inch class and above. We feel it is imperative that something be done to improve quality fishing on the Little Wolf River. Therefore we propose a catch and release program be instituted on a segment of the Little Wolf River from the County Highway "BB" bridge down stream to the County "X" bridge at Fleece's Landing. This would include the segment of the South Branch of the Little Wolf down stream from State Highway "22" to its confluence with the Little Wolf.

We further propose one trophy Small Mouth Bass "19"" or above may be kept per season, on your honor.

We feel most avid fishermen would be willing to give this an opportunity to see if this proposal would improve the quality of bass fishing on the Little Wolf.

Sincerely,
John W. Pieper - Representative
