**The Problem:**

3 day mid archery season license purchase waiting period.

Young bow hunters turning 12 years of age during the Wisconsin archery season cannot purchase their license until said birth date, and then they must wait three days. Thus they cannot bow hunt until they are 12 years and 4 days old.

**Where as,** there is no waiting period for a license purchase during the 9 day gun season.

**Where as,** new youth hunters are being penalized upon turning 12.

**BE IT RESOLVED,** the Conservation Congress at its annual meeting held in Wood County on 4/16/2007 recommends that the Department of Natural Resources take action to correct this situation by introducing rule changes exempting young hunters turning twelve years of age during the Wisconsin Archery Season from the 3 day waiting period for mid season archery license purchase.
