**Title: 6 Fish Bass Limit**

**The Problem:**

Over population of bass in many lakes state wide. To many bass in lake makes for over population. This would help with under populations of other species.

Instead of having no size limits on certain lakes we can have a bigger bag limit on lakes state wide.

Present law is 5 fish limit.

BE It RESOLVED, that the conservation congress recommend that conservation congress work with the Department to take action to correct this situation by introducing a rule change to allow a 6 fish limit state wide for Bass.
