

~~##~~ CODE 70 #2 2010

Equal opportunity for trappers.

Whereas; bear hunters are allowed to bait before season to select the best bear to hunt and hound hunters are allowed to train their dogs prior to the season to improve the efficiency of their hounds.

Whereas; trappers can not bait, or lure prior to the opening of bobcat season.

Whereas; trappers only draw a tag for bobcats once every five to six years, and then we are only notified within six weeks of the season opener, that we drew a tag for this season. This puts the trappers at a large disadvantage.

Whereas; This would increase the efficiency of the trapper and help them target a more productive area.

Whereas; trappers would be limited to the amount of bait used in a dirt hole set during the trapping season.

Be it resolved that we asked the DNR and the Legislature in Madison that the trappers be allowed too bait, lure prior to the opening of the season.

This resolution having been read to the people of Waushare County on this day April 12, 2010, for Wisconsin Conservation Congress.
