RESOLUTION

THE PROBLEM:

Wild Turkey management Zone 2 extends from the north end of Door County to the Illinois state line, including virtually all the densely populated Southeastern part of the state. The large number of metropolitan hunters make permits scarce for local hunters in the northern portion of the zone where farmers incur considerable crop damage and would like to see more tags for local hunters.

WHEREAS in view of the above

Be it resolved that those attending the Conservation Congress Annual Meeting in Door County April 11, 2011 request the DNR split the north and south portion of Turkey Management Zone 2 into two (2) zones, perhaps at or near State Highway 23.
