Title: Coyote Season

The Problem:

Currently, coyotes can be taken year round. Coyote populations seem to be declining in many areas. There are probably many reasons for this decline. A coyote season would protect this valuable predator during the time of year that they are having their pups.

BE IT RESOLVED, that the Conservation Congress at its annual meeting held in Sauk County on April 14, 2014 recommends that the Conservation Congress work with the DNR to take action to correct this by introducing a season on the coyote.
