Citizen Resolution # 21-03-15

(For Hearing Officer completion)

Small Mouth Bass population in Lake Lucerne

If the DNR Survey finds an over abundance of Adult Small Mouth Bass in Lake Lucerne. I and many other riparian owners on Lake Lucerne would prefer fishing out the Adult Small Mouth Bass, rather than netting and removal of the fish from the lake.

BE IT RESOLVED,

A change in the regulated size and daily bag limit along with the possibility of an earlier season could, and would provide needed control the population of Small Mouth Bass.
