Change Trout Regulations on Devils Creek and Weirgor Creek watersheds in Rusk and Sawyer Countys

The new trout regulations place a three fish limit on both creeks and several of their feeder creeks

Because of light fishing pressure there is no need for such a restricted bag limit.

Access to most of these streams is difficult due to there remoteness.

Most local fisherman feel its not worth fishing with such a limited bag limit.

Therefore be resolved that Devils Creek and Weirgor Creek watershed trout regulations be changed to green for both streams and all feeder streams.
