TOPIC: Hunter Safety

THE PROBLEM

I would like to see a resolution put into law by allowing a hunter to leave his or her safety strap attached to the tree overnight on state owned land south of Hwy 64 so when a hunter get's up to there desired height all they have to do is grab there tether which is hanging off of there safety harness which they are already wearing and click on to there safety strap which is already attached to the tree preventing any chance of falling because of not having to put this strap around the tree every morning.

In total darkness, I find it's more dangerous having to wrap this strap around the tree every morning in total darkness then it is climbing the tree, I can't even te3ll you how many times I've almost fallen out of the tree trying to secure the safety strap to the tree every morning.

BE IT RESOLVED

Please pass that so hunter's don't have to fall and possibly die because of a silly law such as (nothing can be left in the woods overnight). I'm 59 and I've been hunting all my life! It's just a bad law that we need to change!

(Note) can be attached to the tree at the beginning of the season and must be removed at the end of the season.

Any Questions Please contact me at 262-521-8674

Sincerely

Randy Lichty
