

**SUBJECT: LAND TRANSFER – BIG MUSKEGO LAKE WILDLIFE AREA - WAUKESHA COUNTY**

**FOR: DECEMBER 2007 BOARD MEETING**

**TO BE PRESENTED BY:** Richard Steffes

**SUMMARY:** The Wisconsin Department of Transportation (WI DOT) has proposed to transfer 137.59 acres of land to the Department for the Big Muskego Lake Wildlife Area in Waukesha County. The property was purchased by WI DOT in 1994 for a wetland mitigation site for its STH 36 reconstruction project. As part of this transfer, WI DOT will place some restrictive covenants on the property to ensure the goals of the Wetland Mitigation Program are recognized in perpetuity.

The Big Muskego Lake Wildlife Area surrounds the 2,073-acre Big Muskego Lake and encompasses wetlands, upland grasslands, woodlands and agricultural areas. The majority of the 3,800-acre project area is located in the City of Muskego in Waukesha County and extends into northern Racine and western Milwaukee counties. Big Muskego Lake and surrounding wetlands comprise a unique shallow lake-wetland complex in the midst of a rapidly developing urban area. The lake receives heavy use by anglers and waterfowl hunters, and wildlife viewing in this area is on the increase. Acquisition of recreational lands in the heavily populated southeast part of the state is a priority for the Department.

The 137.59-acre parcel, will contribute to the Department's goal of creating wildlife habitat and providing public open space around Big Muskego Lake. The WI DOT property lies entirely within the 3,800-acre Big Muskego Lake Wildlife Area project on an associated prairie pothole pond. The property has more than 9.180 feet of water frontage; the entire perimeter of the 2.5-acre prairie pothole and four agriculture ditches through the property. Acquisition will provide about 30 acres of quality restored grassland habitat, 37 acres of woods, 62 acres of wetland, 6 acres of brush, and the 2.5-acre prairie pothole.

Acceptance of this transfer will provide wildlife management, protect the shoreline and water quality, provide opportunities for public recreation in a heavily populated area of the state and protect the natural values of the property from the impacts of development incompatible with the goals of the project

**RECOMMENDATION:** That the Board approves the transfer of 137.59 acres of land for the Big Muskego Lake Wildlife Area in Waukesha County.

Zoning: Agriculture/RecreationPresent Use: Wetland MitigationProposed Use: Resource protection and public recreationProperty Taxes: exemptOption Date: April 26, 2007Tenure: DOT acquired the land in 1994 at a cost of \$351,500.2. JUSTIFICATION:

The Wisconsin Department of Transportation (WI DOT) has proposed to transfer 137.59 acres of land to the Department for the Big Muskego Lake Wildlife Area in Waukesha County. The property was purchased by WI DOT in 1994 for a wetland mitigation site for its STH 36 reconstruction project. As part of this transfer, WI DOT will place some restrictive covenants on the property to ensure the goals of the Wetland Mitigation Program are recognized in perpetuity. The 137.59-acre property has very diverse

habitat ranging from wetlands to high-quality oak woods. WI DOT has completed several restoration projects on the site in addition to management efforts such as prescribed burns.

The Big Muskego Lake Wildlife Area surrounds the 2,073-acre Big Muskego Lake and encompasses wetlands, upland grasslands, woodlands and agricultural areas. The majority of the 3,800-acre project area is located in the City of Muskego in Waukesha County and extends into northern Racine and western Milwaukee counties. Big Muskego Lake and surrounding wetlands comprise a unique shallow lake-wetland complex in the midst of a rapidly developing urban area. The lake receives heavy use by anglers and waterfowl hunters, and wildlife viewing in this area is on the increase. Acquisition of recreational lands in the heavily populated southeast part of the state is a priority for the Department.

The 137.59-acre parcel, located in southeastern Waukesha County in the City of Muskego, will contribute to the Department's goal of creating wildlife habitat and providing public open space around Big Muskego Lake. The WI DOT property lies entirely within the 3,800-acre Big Muskego Lake Wildlife Area project and includes a prairie pothole pond. The property has more than 9,180 feet of water frontage; the entire perimeter of the prairie pothole and four agriculture ditches through the property. Acquisition will provide about 30 acres of quality restored grassland habitat, 37 acres of woods, 62 acres of wetland, 6 acres of brush, and the 2.5-acre prairie pothole. With most of the development work already complete; i.e., gravel access road, surveys, wetland and grassland restorations, only minor enhancements to the habitat and boundary posting are the remaining work activities left to the Department once the transfer is final.

Acceptance of this transfer will provide wildlife management, protect the water quality, provide opportunities for public recreation in a heavily populated, and rapidly urbanizing area of the state and protect the natural values of the property from the impacts of development incompatible with the goals of the project.

3. FINANCING:

No funding is needed for this transfer.

4. ACQUISITION STATUS OF THE BIG MUSKEGO LAKE WILDLIFE AREA:

Established: 1999  
Acres Purchased to Date: 287.66  
Acquisition Goal: 3,800.0 Acres  
Percent Complete: 7.6%  
Cost to Date: \$1,148,024

The DNR Managed Lands Inventory is the database of lands managed by the Wisconsin Department of Natural Resources. The Wisconsin DNR manages these lands through various ownership arrangements. This data set is a spatial representation of the forest and open lands managed by the DNR, Bureau of Facilities and Lands (BFL), and may include other land ownership information. The data should not be interpreted as a legal representation of legal ownership boundaries.

This data set does not differentiate between lands that are open or closed to the public for hunting and/or general public access. Some lands represented in this data set may not be open to the general public, or may have specific limitations or restrictions on public use. This data set is not intended for use as a land management tool. It is a listing of all DNR land ownership transactions that have occurred on these lands over time.

For information about the actual management, including public use and public access, of the lands, contact the Bureau of Facilities and Lands. Contact information for DNR Regional Offices and Service Centers is provided on the following internet site:

<http://www.dnr.state.wi.us/org/bfl/regions/index.htm>

Updates to this data set are ongoing, and will be incorporated into future versions when available.
