

# COUNTY CODE #4 RES #3 2013

**Title: Education on handling lead at private and public ranges**

**The Problem:**

Lead in shooting ranges is a concern for shooting range clubs and the general public. A seminar of around 4-5 hours could be created that covers recycling lead and how to remove it from ranges. The seminar should help clubs, private, and public ranges learn the best ways to create an Environmental Stewardship Program for their range. Information to help create such a plan is available from the Environmental Protection Agency, The NRA, and the National Shooting Sports Foundation. A number of seminars covering these topics should be available throughout the State.

BE IT RESOLVED: that the Conservation Congress at its annual meeting on May 10-13 in Eau Claire County work with the DNR and create such a class as quickly as possible and implement the seminar
