

Resolution

490514

Whereas, Polk county has not had any deer test positive for CWD, and several years have passed with testing done for CWD and none has been found in the whitetail deer herd here, We feel we should be taken out of a CWD unit. There should be some type of sunset clause on being CWD and be able to be taken out of that label. We feel it is harmful to our economy and to the deer herd itself. With this label the locker plants have been charged high fees to dispose of the remains after processing, farmers and hunters, and business owners alike have been impacted as a CWD label hurts tourism. Also the fawns that would have a chance at being put back into the wild are instead killed, if they have the misfortune of loosing a Doe to raise them.
