

CORRECTED MAP: 2016 Spring Hearing question #26

QUESTION 26. Modification of the early season walleye fishing in the Fox River (050515)

Current fishing regulations and new access to the river along the river walk in De Pere has increased access for anglers to this popular area during the spring walleye run. Night fishing creates unique challenges for law enforcement and illegal activities can be more difficult to detect at night. A night fishing prohibition area, similar to those found on the Peshtigo and Oconto River systems, could be established to assist law enforcement in reducing the illegal activity in this area during the spring walleye spawning run. (See the proposed area on the map.)

26. Would you support a nighttime fishing prohibition during the spring walleye spawning run (March 1 to the regular fishing opener) within the shaded area below the De Pere Dam on the map? 26. YES _____ NO _____
