### **Fur Harvest Advisory Committee:**

The mission of the Fur Harvest Committee of the Wisconsin Conservation Congress is to promote the wise use, management and protection of the Wisconsin's natural resources; specifically its renewable natural resources, and its furbearing wildlife species. We promote the harvest of furbearers through regulated hunting and trapping. We will accomplish our mission by considering sound science and through cooperation and partnerships with user groups, researchers and regulatory agencies. We will take into consideration the ideas and input of citizens. We will make recommendations, through the application of science based management, to the Natural Resources Board and the legislature to assure future generations have ample and healthy furbearer populations and natural resources.
