

BULLSNAKE SIGHTINGS WANTED!

Bullsnake Sighting Initiative (WDNR)

Please help us learn more about the distribution and status of this rare species in Wisconsin.

Bullsnake Description

- Length of 5-6 feet or more
- Heavily patterned head
- Pointed snout
- Mid-body is heavily blotched
- Tail has alternating brown/black and yellow/beige rings

To report sightings and for more information, please visit the following website:

<http://dnr.wi.gov/org/land/er/forms/bullsnakeobs.asp>

Bullsnakes are a "Protected Wild Animal" and cannot be taken from the wild. To document sightings, please use photographs.

Similar Species:

Eastern milksnake: Head heavily patterned with a rounded snout. Often a "v" or "y" shaped marking on top of head. Body blotches are brown to reddish and bordered by black.

Western foxsnake: Head is usually a uniform rust or orange color with a rounded snout. The body has solid dark brown blotches that overlay a yellowish to tan background.
