CHINOOK SALMON

2006	Strawberry Creek	LV	16,000	Lake Michigan
2007	Strawberry Creek	ARV	37,000	Lake Michigan
2008	Strawberry Creek	ALV	40,250	Lake Michigan

COHO SALMON

2008	Root River	A-CWT	10,813	Lake Michigan
------	------------	-------	--------	---------------

Many lake trout and Chinook salmon have been adipose-clipped to indicate they carry a tiny coded wire tag (CWT) in their snout. A trained technician must find and decode these tags to determine stocking information. This information is important for the future management of Lake Michigan. Please take these fish to one of the collection stations located in each lakeshore community or call one of the DNR field stations listed below:

Peshtigo: (715) 582-5052
 Sturgeon Bay: (920) 746-2860
 Green Bay: (920) 662-5480
 Mishicot: (920) 755-4982
 Plymouth: (920) 892-8756
 Milwaukee: (414) 382-7929

These fin clip patterns are for the Lake Michigan and Green Bay waters of the State of Wisconsin only. Trout and salmon with other fin clip patterns can originate from other states, and would be considered “strays” in Wisconsin waters. Fin regeneration makes some clips difficult to see. Note: These are not total numbers of trout and salmon stocked, only those that have been fin clipped. For non-specific locations listed in the summary please see the latest Wisconsin’s Lake Michigan Salmonid Stocking Summary (PUB-FH-828 2009).

*Tagged fish: Your cooperation in returning these tags to the address below or the address listed on the tag, along with the species of fish, length, weight (if known), date and location caught will be greatly appreciated. This information will help us make the Lake Michigan fishery even better.

*When releasing a tagged fish, please leave the tag in place.

For more information on tagged fish please see the WDNR web site at: FishingWisconsin.org.
