

Species Assessment Group - Summary of group ratings

Date: 9.20.07

Species: Lymantria dispar - Gypsy Moth European Type

Members of the SAG: Art Wagner, Dr. Ken Raffa, Melody Walker, Anette Phibbs, Dr. Glen Stanosz, Karen Danielsen

Linda Haugen

Ratings for Criteria - 1st round	1	2	3	4	5	6	7	8	9	10	11	12	13	14
1. Current status and distribution	2	2	3	3		2	3							
2. Establishment potential	4	4	4	4		4	4							
3. Damage potential	3	4	3	4		3	3							
4. Prevention and control potential	2	3	3	3		3	2							
5. Socio-economic impacts	2	4	3	2		3	4							
Totals - 1st round	Prohibited				Restricted				Watch				Non-restrict	
Number of votes					6									

Recommended Classification : *Restricted*

Comments: The European Gypsy Moth is widespread in eastern Wisconsin yet restricting movement from infested areas into non-infested areas is still an important option for managing the spread of this organism. Maintaining restrictions on movement will supplement the statewide gypsy moth slow the spread and suppression program.

Ratings for Criteria - 2nd round	1	2	3	4	5	6	7	8	9	10	11	12	13	14
