PO Box 7921
Madison, WI 53707-7921

Dear Mr. Lynch:

Re: Exploration License No. 41002
GTAC Exploration No. 2
Revised Mapping

Gogebic Taconite, LLC submits to your agency revised mapping for Exploration License #41002. As discussed during your agency's site visit, the mapping has been modified to reflect the use of Access Road No. 5 for corehole sites 646-2 and 646-2V. The proposed access as shown in the application proved to be too steep for winter conditions and existing Access Road 5 provided more gentle grades for equipment access. The road has been snow plowed and the road surface has frozen to provide a stable road bed.

No operational changes are proposed and the number and depths of the proposed borings remains unchanged.

The 600 ft MFL boundary per Wisconsin Statutes 77.83 (2m) has been revised on the mapping to reflect the access road addition.

The revised maps include:

- Map 1 - Site Location Map
- Map 2 – Property Control

Please advise if there are any questions concerning this matter.

Sincerely,

Timothy J Myers
Engineer
