

WAUKESHA WATER UTILITY
CITY OF WAUKESHA, WISCONSIN
Public Briefing on Great Lakes Water Application

Done
11/15/13

QUESTIONS FORM

November 13, 2013

Our meetings will start with a 30- to 40-minute presentation by Waukesha Water Utility General Manager Dan Duchniak on the application for Great Lakes water. There will also be individual stations – staffed by utility employees or consultants – where members of the public can get further information on specific topics.

Dan will also respond to written questions for 20 minutes following his presentation. If you have a question you want to ask Dan following the presentation, please use the form below. You can also ask your question at the appropriate station.

Date: 11/13/13

Name: Laurie Longtine

Address: longtine@wi.rr.com

Who you represent: _____

Question: Flu question to my guest. re benefits to
OC & Franklin of forming a regional water utility?
You said 20-30% utility rate reduction to
O.C. customers. (Franklin customers too?)

Is 20-30% due to WWU ~~is~~ purchasing water
from O.C.? Or are there additional reductions
from the creation of the regional water utility benefitting
OC & Franklin customers?

In other words is the 20-~~30~~ 30% a total
of both purchase & reg. utility or just the addition
of reg. water utility? I'll take my answer "off

"Your Comments are Important"

the air, so to
speak."

Date: 11/13/2013

Name: MICHAEL MECHA

Address: 10420 S. JUSTIN DRIVE

Who you represent: Self

Question: Oakwood LAKE ESTATES experiences numerous high water issues as a result of runoff entering our lake from the ditch on Oakwood Road. Per the 1994 analysis, this LAKE was to experience this situation on very rare occasions. This is not the case. With the millions of gallons of water added to this watershed on a daily basis, what is being done to ensure we do not encounter increased beach erosion and flooding as a result of this project.

PUBLIC COMMENT FOR DEPT. OF NATURAL RESOURCES

November 13, 2013 *Question*

Waukesha's application is currently being reviewed by the Wisconsin Department of Natural Resources. If you want to provide comments to the DNR, you may drop this completed form in the **COMMENT BOX** or you may mail it to the DNR at Wisconsin DNR, DG/5, PO Box 7921, Madison, WI 53707-7921, Attention: Kassie Lang, no later than December 2, 2013.

Date: 11/13/13

Name: David Ciepluch

Address: 728 W Abbott Ave, Milw 53221

Who you represent: Myself as a Milw citizen

Comment: 1) What are the funding sources for the entire project?

2) What are plans to re-establish deep aquifer to pre-settlement levels if Waukesha is successful?

3) Waukesha has over exploited a resource and lived beyond the carrying capacity of the land. Why not move closer to the water source?

4) The reason the Root River has problems is due to development and farming practices. What will Waukesha do to improve river bank buffers and water infiltration possibilities on the river?

Our meetings will start with a 30- to 40-minute presentation by Waukesha Water Utility General Manager Dan Duchniak on the application for Great Lakes water. There will also be individual stations – staffed by utility employees or consultants – where members of the public can get further information on specific topics.

Dan will also respond to written questions for 20 minutes following his presentation. If you have a question you want to ask Dan following the presentation, please use the form below. You can also ask your question at the appropriate station.

Date: Nov. 14, 2013

Name: Elizabeth Lampark

Address: 5929 Three Mile Rd.

Who you represent: _____

Question: In today's Milwaukee Journal
Sentinel, Racine Mayor John Dickert
stated he is "utterly disappointed"
that the Root River will not be
monitored by Waukesha. This is
a serious concern and there is no
guarantee that the DNR will do
the long-term monitoring, especially
with Secretary Cathy Stepp's laissez-faire
philosophy.

QUESTIONS FORM

November 14, 2013

Our meetings will start with a 30- to 40-minute presentation by Waukesha Water Utility General Manager Dan Duchniak on the application for Great Lakes water. There will also be individual stations – staffed by utility employees or consultants – where members of the public can get further information on specific topics.

Dan will also respond to written questions for 20 minutes following his presentation. If you have a question you want to ask Dan following the presentation, please use the form below. You can also ask your question at the appropriate station.

① ~~What are your current phosph effluent phosphorus~~
concentrations

Date: 11/14/13

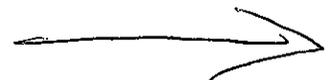

Name: Sarah ~~Wright~~

Address: City of Racine Health Department
730 Washington Ave, Racine, WI 53402

Who you represent: ~~City of Racine Health~~

①
Question: Although your phosphorus effluent ~~the~~ concentrations are lower than the state standard, the Root River will have a long period of ^{reduction of} restoration projects ^{in order} to be delisted due to high current phosphorus ~~levels~~ concentrations. You are still contributing phosphorus to the system and therefore ~~make it more difficult~~ ^{do not make it easier} for other areas to achieve compliance. The ultimate goal is ^{for the Root River} to be delisted ~~for~~ phosphorus: how will Waukesha ~~help us~~ ~~become involved~~ help us get there? through other methods besides mild dilution?

"Your Comments are Important"

② What are your ~~current~~ ^{proposed} phosphorus effluent concentrations for meeting the 0.075 standard?

③ Other parts of the world that have even more dire water supply scenarios have been world leaders in implementing water conservation measures more aggressive than the measures proposed in the Waukesha applications. Why has this alternative not been ~~addressed~~ publicly evaluated?

WILL WAUKESHA CONSIDER
CONTRIBUTING A RESTORATION
FEE TO THE RR RESTORATION
PLAN ? ~~NO~~ (PLAN NOW
IN PROGRESS)

Comment: _____

- How will we be guaranteed that no pharmaceutical drugs will be dissolved in the water?

- There seems to be more areas much closer to dump effluent from Waukesha's facility. It makes more ecological sense to return water to the headwaters of system so that wetlands & other natural filtration can do the trick to ease the minds of the community. The outflow seems to close to the city so it's to allow for further breakdown of the organic matter.

Name: Richard PHANNENSTIL → 33 year Resident

Address: 8009 County Line Rd Racine/Wisconsin

Who you represent: myself, My neighbor & homes in Area

& Question

Comment: Background → I live about 1/4 mile from the Root River & the Hunts (Superfund) Toxic Land Fill. The entire Area is a Flood plain.

The Root River Regularly over ~~flows~~ ^{flows} (direct correlation to the amount of rain & or melting snow received in Wis or maybe Minnesota as well. @ County Line Road floods often -- maybe 10-15 times per year. -- & the Road is blocked off by Police. Same applies to Area on Oak wood & 76th St in Franklin where Root River flows.

In Spring it is common where my & neighbor home is surrounded by water & 3 sides & sometimes 4 sides. For example, in the 2008 Floods I had 6 feet of water in my basement & my neighbor 3-4 feet in basement

Over

Questions

Rick Phawenstall

8/23/15

I ASSUME Waukesha/County has a State of Flood
PLANS? If yes

① Will this project reduce Flooding in Flood
PLANS in Waukesha/City, etc.

② If yes, then that water (I assume) will be
put into the Root River & out to LAKE MI,
^{then}

~~③ This means that~~

If less water in Waukesha Flood plains, then
that means more water in down stream areas in Glendale
ie County Line Road, Oakwood to 76th St.

③ Adding about 6" of water (depth) to Root River is
no big deal during dry summer months. But adding
~~6"~~ 6" of more water in rainy season (spring) & snow
melt, this 6" now becomes a big deal. For ex,
instead of me getting 6' of water in my basement I
will now get 6 1/2 feet.

I live about 1/4 mile BR the Post River & The
Hunts Land Fill (Superfund) - - ON County Line Rd.

^{Two} Home in this Area is entirely surrounded
by Flood plains,

The Post River in this Area Regularly overflows
It Breaks & Regularly (10-15+ times per year)

Overflows closing the Road & Filling surrounding

FARMER fields with water
As a result of the water project
it will there be reduced flooding
in the unpopulated Area/County A.

I assume unpopulated
at State of Flood plains.

No Rain gauge

Post River 16.7 million of water daily will be released into
the RR daily - - depth of water in River will 7 by 6"

There will be benefit to the River in the dry season by

Adding the additional 6" of water. Over

pg 5/5

- ① Will the Post River be dredged?
- ② Will ^{years of} dead & fallen trees be cleared to increase flow of Post River downstream?
- ③ What is the plan to make the RR flow more swiftly ~~so~~ so as to ~~reach~~ move water faster to Lake MI thereby reducing flooding which ^(+ always) now exists

The Hunter Land Fill (Super Fund Cleaned up) ^(+ another large pond nearby) has two large ponds adjacent to the Post River.

As a result, these two ponds will overflow more frequently & ~~adding~~ sending possibly contaminated water into the Post River & into Lake MI. ^(added contamination) Plus in the flood plain lands surrounding the Hunter Super Fund site.

What will be done to Reduce the Amount of water in Flood plains in Caledonia / Root River Area?

(4) Will the Root River be dredged to remove decads of silt & other build up - so as to move the water fast into LAKE MT. What is the Plan to

(5) Will years of Fallen Trees & other Rubish (trees) be cleared so as to Improve Flood Flow

(6) My home (& neighbor) will be negatively impacted by adding more water (even just 6" to the Flood plain

(7) FMR should provide (at my fire) Flood Insurance to help US home owners ~~out~~ who will be negatively impacted (with more water added to our Flood plains) ^{OR Buy my home on 1 3/4 Acre}

Note -> I also spoke to the dictaphone lady who typed my similar questions as state help. [It is a new fast typist - impressive?]

Date: 11/14/13

Name: Brian Turner

Address: 3605 Haven Ave. Racine, WI 53405

Who you represent: A city resident.

Comment: If Waukesha is able to obtain water, what
environmental improvements will be made exactly? I
think there should be some aspect of funds allocated
to do such things such as remove the Artick Dam that
the city of Waukesha pays for. There seem to be no
clear plan as to what Waukesha really is going to do.

Also, how are we going to know if some water company
won't go to set up a water filtration station & send
bottled water to all areas of the U.S.? The same goes for
increasing Waukesha's ability to grow.

What is really in this for us? It seems
like we're getting "pooped" on... punn intended.

WAUKESHA WATER UTILITY

Waukesha water supply from
Lake Michigan with 100%
return via Root River. Mainly
for the improved quality of
the river. And for the good
of Waukesha's citizens

WAUKESHA WATER UTILITY

Public Briefing on Great Lakes Water Application

PUBLIC COMMENT FOR DEPT. OF NATURAL RESOURCES

November 14, 2013

Waukesha's application is currently being reviewed by the Wisconsin Department of Natural Resources. If you want to provide comments to the DNR, you may drop this completed form in the **COMMENT BOX** or you may mail it to the DNR at Wisconsin DNR, DG/5, PO Box 7921, Madison, WI 53707-7921, Attention: Kassie Lang, no later than December 2, 2013.

Date: November 14, 2013

Address: 2916 Willowtree Circle, Racine, WI 53405

Who you represent: my family

Comment:

I have concerns re: Root River treated wastewater delivery plan.

In the spring the Root River has flooded with snow melt and heavy rains. The last 2 years it has flooded with homes sustaining much damage.

At these times when the Root water level is naturally high, is there a plan to withhold this water until levels become lower.

I do not want my home destroyed.

Who you represent: ^{citizen} ~~Waukesha Water Utility~~ ~~Waukesha Water Utility~~ ~~Waukesha Water Utility~~ ~~Waukesha Water Utility~~

Comment: Waukesha attempts to make a big point that it is going to improve the fishery and conditions for the fishery on the Root River. Has Waukesha and the Wisconsin DNR addressed the issue that the food sources for fish in Lake Michigan are rapidly declining, and, if so, explain why this discharge would be of any benefit to the angler??

Also, if odors from sewage being discharged into the Root River causes residents to move, will the City of Waukesha help cover costs for the loss of residents in those properties/ loss of taxpayer dollars?

1 TRANSCRIPT OF PROCEEDINGS

2 PARTICIPANT BORCHARDT: John

3 Borchardt, B O R C H A R D T. I'm for the
4 diversion. I think it will be an improvement to
5 the water. Hopefully, it will not increase
6 flooding. That's it. Simple.

7 PARTICIPANT GRYCZKA: Michael

8 Gryczka, G R Y C Z K A. I support the concept and
9 the water application as it was restated in
10 October. I believe this is one of the most viable
11 and acceptable ways of getting water. I think of
12 it as a fountain where you draw it up, and we're
13 returning 100 percent. The fact that the water is
14 clean and has very low impact on the surrounding
15 environment pleases me, so I'm in support of the
16 application. Thank you.

17 PARTICIPANT RICHARDS: Dale Richards

18 from Oak Creek. I thought the presentation was
19 more than adequate, and I'm totally supportive of
20 this project. That's it.

21 (Whereupon, the statements concluded

22 at 8:00 p.m.)

1 TRANSCRIPT OF PROCEEDINGS

2

3 DIRECT TESTIMONIAL STATEMENT

4 By: Mayor John Dickert
5 730 Washington Avenue
6 Racine, WI 53403

6 MR. DICKERT: Number one, I am the vice
7 chair of the St. Lawrence -- Great Lakes & St.
8 Lawrence Cities Initiative board of directors,
9 okay. Our president of our board is in opposition
10 to this diversion, as well as our board of
11 directors, and I am also opposed.

12 Um, there's a couple things that are of
13 concern to us. Number one, that the Great Lakes
14 compact directs that the decision for a withdrawal
15 from the Great Lakes is supposed to be the last
16 resource. This is being used as a first resource.
17 Okay.

18 The next thing is that we have seen no
19 effort by Waukesha to provide testing downstream to
20 the City of Racine as promised. So that we will
21 not know the fluent that's coming down the Root

22 River, which we need.

23 And, third, that there is a -- what's the

24 best way to put it? There is a, um, there's

25 confusion between the amount of water that's being

1 requested versus the amount of water that's needed.

2 We believe that the request for water is far

3 greater than the need.

4 And, lastly, I would say that the

5 opportunity to filter the water that Waukesha is

6 getting currently, or to dig a shallower well, are

7 options that need to be discovered first.

1 DIRECT TESTIMONIAL STATEMENT

2 By: Allison Chernouski
3 2219 West High Street
4 Racine, WI 53404

5 MS. CHERNOUSKI: Our communities along
6 the Root River have invested millions of dollars in
7 improving the conditions of the Root River, and
8 we're working on extensive restoration efforts
9 going forward.

10 I'm not aware that the City of Waukesha has
11 ever done anything in the past to help clean up the
12 Root River, or Lake Michigan, for that matter. Why
13 haven't -- why hasn't Waukesha shown an interest in
14 stewardship or support for cleanup and protection
15 of the rivers or the lake on this side of the
16 divide?

17

18

19

20

21

22

24

25

1 DIRECT TESTIMONIAL STATEMENT

2 By: Richard Phannenstill
3 8009 County Line Road
4 Caledonia, WI 53412

5 MR. PHANNENSTILL: In brief, I live very
6 near the Root River, about a quarter mile, and I
7 live near the Hunt's landfill, which is super fun.

8 The road there, County Line Road, it
9 floods, Root River floods regularly, probably ten
10 to fifteen times a year. All the land around there
11 is in flood plains, and the police will have the
12 road blocked off, you know, because the water
13 crosses the road. Often times during the year,
14 spring especially, our house will be surrounded by
15 water on three sides, often four sides.

16 So what I was going to ask, I assume
17 there's flood plains in the Waukesha area, and I
18 was wondering if this project is going to reduce,
19 you know, their flooding as a result, like move
20 water away from their flood plains and make them
21 less, I guess, deep, whatever. And if that's the
22 case, it's going to be moving the water then

22 towards our area, which is then going to increase

23 the amount of water in our flood plain.

24 And my -- in the '82 flood -- or the 2008

25 flood, I had 6 feet of water in our basement, you

1 know, granted there's only 6 inches of water being
2 added, but now that means I have 6 1/2 feet of
3 water, you know, in my basement. In the
4 summertime, though, that 6 inches of water makes no
5 big difference, because the river is dry, it can
6 handle it. In the fall time, spring, when the snow
7 melts, it can't handle it.

8 And I was wondering if they are going to
9 clear the, like dredge the Root River to make the
10 water move faster. Because it's probably got feet
11 of, you know -- you know, silt or whatever you want
12 to call it, silt built up over the years. And the
13 Root River is just loaded with downed trees, people
14 throw tires, you know, in there, and are they going
15 to clear that out, you know, to help the -- help
16 the flow of anything? And then I'll be negatively
17 impacted -- you know, it's a good idea, they need
18 the water, but are we going to be negatively
19 impacted by it?

20 Because, like I said, water will surround
21 our property all the time from the flood plain. So

22 we're going to be getting an added 6 inches. And,
23 you know, if I had flood insurance, I guess, which
24 is expensive, that would be kind of like a -- say,
25 like if it would be a benefit to us, so to speak,

1 so when we do get hit with the floods.

2 So I guess the question would be, would
3 Waukesha pay for flood insurance for residents in
4 that area? It's like talking to a wall, not a
5 smirk on the face. Yeah, so.

6 So I just basically want to know, too, if
7 there's a plan to move the water swiftly, which
8 will reduce the flood plain in the area? I haven't
9 heard any talk on that. So I guess those are my
10 questions.
